SUMMARY

Motivated and detail-oriented Software Engineer with experience in frontend development. Proficient in JavaScript, React.js, and backend technologies like Node.js and MongoDB. Strong understanding of software development methodologies, API integration, and debugging. Passionate about writing clean, maintainable code and collaborating with cross-functional teams. Seeking to leverage skills in software design, development, and troubleshooting to contribute effectively to an engineering team on projects.

EXPERIENCE

Associate Software Engineer

Oct '24 — Present

Codace Solutions Pvt. Ltd

Lahore, Pakistan

- Developed responsive web applications using React.js, improving user engagement and accessibility by 40%.
- Integrated RESTful APIs for seamless data exchange between frontend and backend services, reducing load time by 30%.
- Participated in code reviews, debugging, and optimizing frontend performance, which led to a 25% improvement in page rendering speed.
- Collaborated with designers and backend developers to deliver high-quality software solutions, improving project delivery efficiency by 35%.

MERN stack Intern

May '24 — Oct '24

Codace Solutions Pvt. Ltd

Lahore, Pakistan

- Designed frontend interfaces with React.js, ensuring responsive applications and enhancing user experience.
- Developed and tested RESTful APIs using Node.js and Express, optimizing server-client interactions.
- Implemented MongoDB for data storage and retrieval, improving system efficiency.
- Engaged in debugging, code refactoring, and peer reviews to maintain high coding standards.

EDUCATION

Bachelor's Degree in Computer Science, Government College University Faisalabad

Faisalabad, Pakistan

PROJECTS

ODAPTIC, Company Project

Nov '24 — Feb '25

- Handled frontend responsiveness, ensuring a seamless experience across all devices.
- Integrated backend services, optimizing API calls and improving data flow efficiency and maintenance.
- Optimized the entire website's performance, reducing load times by 40% and enhancing user experience.
- Implemented best practices using agile software development methodology for frontend and backend development, improving overall system reliability.

WORK PAUSE, Personal Project

Aug '24 — Sep '24

- Collaborated with a team of engineers to enhance user experience and ensure clean, maintainable code in both frontend and backend development.
- Developed a dynamic user interface using React.js.
- Built RESTful APIs with Node.js, Express for backend functionality, software documentation and database management using NoSQL.
- Implemented role-based authentication and leave management workflows.

CERTIFICATIONS

Women In Tech Program, Atomcamp

Apr '24

SKILLS

Programming Languages JavaScript, C++

Web Technologies HTML, CSS, Tailwind CSS, React JS, Restful API, Node JS, MongoDB, Express, SQL

Development Tools Github, Postman, Swagger UI

Software Development Areas Frontend Development, Backend Web Development, Responsive Web Design
